Ciro Bianchimani

Functional Analyst | Lead / Senior Full Stack Developer

Buenos Aires, Argentina | +54 11 6502 6238 | bianchimaniciro@gmail.com

PROFESSIONAL SUMMARY

Full Stack Developer and Functional Analyst with extensive experience designing, architecting, and deploying mission-critical systems at a national scale, as well as dynamic SaaS solutions. Specialized in React, Node.js, PHP/Laravel, and SQL/NoSQL database architectures. Proven track record of gathering complex regulatory and bureaucratic requirements to transform them into high-availability software, managing dedicated server infrastructure, and automating logistics and asset tracking processes. C1 Advanced English Level.

WORK EXPERIENCE

Registro Nacional de las Personas (RENAPER) Jan 2023 – Present

Functional Analyst & Lead Full Stack Developer

- **Architecture & Development of SIGDI:** Led the end-to-end design and deployment of the National Document Management and Tech Asset Tracking System. Oversees inventory traceability, movement workflows, procurement support, and hardware lifecycle across all national facilities. (Stack: PHP, Laravel, PostgreSQL, JavaScript, Tailwind CSS, Docker).
- **National Logistics & Field Operations System:** Designed and built a comprehensive platform for operation planning, field technician assignments, travel stipends/tickets handling, and financial viability auditing for nationwide service missions across all provinces.
- **Document & Record Digitization:** Engineered an institutional record digitization system seamlessly integrated with the central asset management platform.
- **Infrastructure & Deployment Management:** Managed dedicated servers for staging and production environments, implementing solutions on centralized state infrastructure for high-concurrency national usage.

Registro Nacional de las Personas (RENAPER) Mar 2012 – Dec 2022

Process Automation Specialist & IT Support

- Designed and developed automated reporting tools using Google Apps Script integrated with Excel for call center operations, significantly reducing data entry time and improving KPI tracking accuracy.
- Provided IT infrastructure support, hardware preventive/corrective maintenance, and operating system diagnostics across a large-scale corporate network.

Web Development & SaaS Freelance Nov 2021 – Present

Full Stack Developer

- **Cognit (Monetized SaaS in Production)**: Conceived, built, and deployed an end-to-end web SaaS for psychologists featuring appointment scheduling, clinical history, automated reminders, and payment tracking, driving down session cancellation rates and outstanding patient debt. (Stack: React/Vite.js, Tailwind CSS, Firebase Firestore, Vercel).
- **VolverFlix (Accessible Streaming Platform)**: Engineered a streaming web application tailored for senior citizens to stream classic national movies, focusing on accessible UI/UX, zero distractions, and frictionless navigation. (Stack: Vite.js, Supabase, Vercel).
- **Radio LD (PWA de streaming de audio)**: Developed a Progressive Web App optimized for low-end mobile devices, offering a simplified audio streaming interface for elderly users with zero ads or complex navigation. (Stack: JavaScript, HTML5/CSS3, Firebase Firestore, Netlify).

Technical Stack

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Next.js, Node.js, Express, Nest.js, PHP, Laravel, Java, Spring Boot 3.

Frontend & UI: HTML5, CSS3, Tailwind CSS, Material-UI, Shadcn/ui, Bootstrap, Vite.js.

Databases & Cloud: PostgreSQL, MySQL, SQLite, MongoDB, Firebase Firestore/Auth, Docker.

Tools & Methodologies: Git, GitHub, RESTful APIs, Postman, Insomnia, Agile (Scrum / Kanban)

Education & Certifications

- **Full Stack Developer Java & SringBoot**

ALURA LATAM ONE, Oracle Next Education | 2023
